

Supplementary Data Table 1: Comparison of T1D incidence in the 0-30 years age range inside the 13.5 month period of the pandemic height (March 2020-July 2021) compared to the incidence in the two previous calendar years. In all base populations, EMRs with T2D confirmed in the medical record were excluded from the analyses.

Incidence (in SARS CoV-2 positive)	Incidence (in SARS CoV-2 negative)	Incidence	Incidence
March 1, 2020-July 15 2021	March 1, 2020-July 15 2021	January 1, 2019- December 31, 2020	January 1, 2018- December 31, 2019
Base population		Base population	
3,299,381	49,670,552	49,663,151	49,679,066
233	21692	26806	27704
