

Checklist for Reporting Human Islet Preparations Used in Research

Adapted from Hart NJ, Powers AC (2018) Progress, challenges, and suggestions for using human islets to understand islet biology and human diabetes. Diabetologia <https://doi.org/10.1007/s00125-018-4772-2>

Islet preparation	1	2	3	4	5	6	7	8 ^a
MANDATORY INFORMATION								
Unique identifier	SAMN35848421	HP-23166-01						
Donor age (years)	22	50						
Donor sex (M/F)	M	F						
Donor BMI (kg/m ²)	31.79	28.8						
Donor HbA _{1c} or other measure of blood glucose control	5.1	5.6						
Origin/source of islets ^b	IIDP	Prodo Labs						
Islet isolation centre	University of Wisconsin							
Donor history of diabetes? Please select yes/no from drop down list	No	No						
If Yes, complete the next two lines if this information is available								
Diabetes duration (years)								
Glucose-lowering therapy at time of death ^c								

Continues on the next page

RECOMMENDED INFORMATION								
Donor cause of death	Anoxia	Stroke						
Warm ischaemia time (h)	0.167							
Cold ischaemia time (h)								
Estimated purity (%)	90	85						
Estimated viability (%)	98	95						
Total culture time (h) ^d								
Glucose-stimulated insulin secretion or other functional measurement ^e								
Handpicked to purity? Please select yes/no from drop down list	No	No						
Additional notes								

^aIf you have used more than eight islet preparations, please complete additional forms as necessary

^bFor example, IIDP, ECIT, Alberta IsletCore

^cPlease specify the therapy/therapies

^dTime of islet culture at the isolation centre, during shipment and at the receiving laboratory

^ePlease specify the test and the results
