

SUPPLEMENTARYFIGURE S1. Electronic Frailty Index Components Derived from the Electronic Health Record

Chronic conditions (Diagnosis Codes)	Vital Signs
1. Anemia	34. Body mass index (Obesity)
2. Rheumatoid arthritis or osteoarthritis	35. Body mass index (Underweight)
3. Atrial fibrillation	14. Systolic & diastolic blood pressure
4. Stroke or transient ischemic attack	
5. Renal disease	Laboratory measurements
6. Diabetes	5. Estimated glomerular filtration rate
7. Dizziness or vertigo	36. Total cholesterol
8. Dyspnea	37. HDL cholesterol
9. Falls	38. Triglycerides
10. Fragility or fracture	39. Potassium
11. Hearing impairment	40. Sodium
12. Congestive heart failure	32. Aspartate aminotransferase
13. Valvular disease	41. Mean corpuscular volume
14. Hypertension	42. Blood urea nitrogen
15. Hypotension or syncope	43. Calcium
16. Myocardial infarction	44. Albumin
17. Coronary atherosclerosis & other heart disease	45. Total protein
18. Melanoma	46. Alkaline phosphatase
18. Blood-related cancer	47. Hemoglobin
18. Cancer (Excluding melanoma, skin cancers, or blood-related cancers)	6. Glucose
19. Dementia	
20. Osteoporosis	Function (Medicare Annual Wellness Visit)
21. Parkinson's disease	48. Activities of daily living
22. Peptic ulcer	49. Instrumental activities of daily living
23. Peripheral vascular disease	50. Self-reported health status
24. Pulmonary disease	51. Chair rise
25. Skin ulcer	19. Diagnosis of dementia or cognitive impairment
	11. Hearing concerns / use of hearing aid
26. Thyroid disease	52. Stress
27. Urinary incontinence	33. Pain
28. Urinary system disease	
29. Blindness or other vision defects	Other
30. Weight loss	53. Smoking status
31. Depression	54. Polypharmacy
32. Mild liver disease	
32. Moderate to severe liver disease	
33. Chronic pain
